PROFESSIONAL SUMMARY

Mobile Tech Lead and Senior Software Engineer with 8+ years of experience across Automotive, Embedded Systems, IoT, Mobile Applications, Enterprise Software, EV Charging Systems, Banking Platforms, and Construction Management Solutions.

Strong expertise in Flutter, Android, Kotlin Multiplatform, Java Spring Boot, C/C++, and system integration. Experienced in leading development teams, designing application architectures, mentoring engineers, conducting code reviews, and delivering complex software products throughout the full software lifecycle.

Background includes Automotive (AUTOSAR, ASPICE, ISO26262), GPS Tracking, Banking Applications, Education Platforms, EV Charging Ecosystems, and Autodesk Construction Cloud integrations.

CORE SKILLS

Leadership: Technical Leadership, Architecture Design, Code Review, Mentoring, Requirement Analysis, Agile/Scrum

Mobile: Flutter, Android (Java/Kotlin), Kotlin Multiplatform, Swift

Backend: Java Spring Boot, REST APIs, Kafka, MQTT

Cloud & Integration: Azure Storage, Firebase, Autodesk Construction Cloud

Automotive & Embedded: AUTOSAR, ASPICE, ISO26262, Embedded Linux, Qt/QML, C/C++

Tools: Git, Jira, Confluence, Redmine, Postman

PROFESSIONAL EXPERIENCE

IOTEK — Senior Software Engineer / Backend Developer (Nov 2025 – Present)

MCMS Platform

- Develop backend services using Java Spring Boot.
- Integrate Autodesk Construction Cloud with MCMS.
- Work with Kafka, Azure Storage, Angular, Flutter, and REST APIs.
- Participate in architecture discussions and customer support.

FFT Company — Mobile Tech Lead / Lead Frontend (Oct 2021 – Present)

Key responsibilities:

- Lead multiple mobile projects in EV Charging, HRM, Banking, GPS Tracking and Retail domains.
- Define technical architecture and development standards.
- Perform code reviews and mentor developers.
- Participate in sprint planning and technical estimations.

Representative projects:

- Stouch / Snew / NVCharge – EV charging ecosystem.
- SmarHR – Human resource management platform.
- LPBank LOffice – Enterprise office platform.
- MB Bank MOffice – Enterprise office platform.
- FFTGPS / NaviTracking – GPS tracking solutions.

Early Start (Monkey) — Mobile Team Lead (Aug 2021 – Oct 2022)

Projects:

- Monkey Stories
- VMonkey

Responsibilities:

- Lead mobile development activities.
- Review code and mentor team members.
- Support architecture and delivery planning.

VNET / SonHa Group — Android Team Lead (Feb 2021 – Aug 2021)

TOPGPS / VNETGPS

- Led Android component development.
- Participated in requirement analysis and SRS creation.
- Delivered GPS tracking applications for customers.

FPT Software — Software Engineer / Team Lead (2018 – 2021)

Projects:

- Panasonic Kingdom
- A1 Platform
- Automation Tool
- AUTOSAR Safety Platform

Responsibilities:

- Automotive software development.
- Embedded software development.
- Team leadership for MessageApp activities.
- ASPICE and ISO26262 process participation.

EDUCATION

Hanoi University of Science and Technology (HUST)

Bachelor of Electronics and Telecommunications Engineering

Achievements:

- Microchip Scholarship Recipient
- Scientific Research Excellence Award

CAREER HIGHLIGHTS

- 8+ years in software engineering.
- 5+ years in leadership roles.
- Extensive experience in Flutter, Android and Kotlin Multiplatform.
- Experience across Automotive, Banking, Education, IoT and Enterprise domains.
- Hands-on experience with Java Spring Boot and Autodesk Construction Cloud integration.

- Strong background spanning Embedded Systems through modern Cloud-connected applications.
