

CURRICULUM VITAE

BUI XUAN TRUONG

PERSONAL DETAILS

Full Name:	Bui Xuan Truong
Job Titles:	Senior Developer
Date of Birth:	June 13 st 1994
Place of Birth:	Thai Binh, Vietnam
Gender:	Male
Linkedin	https://www.linkedin.com/in/bui-xuan-truong-43b521190
Phone/email	+84359018836 / buixuantruong.tb@gmail.com

SUMMARY INFORMATION

Have 5 years experiences on developing software (C, C++, C#, Qt, Qt UI, QML, Java, Android, Python, flutter, swift)

Have 3 years experiences on developing for mobile (C++, C#, Java, flutter, swift)

Have experiences and deep understanding on developing software for Media service in Vehicle, Linux system, Embedded system, IOT,

Have experiences in testing project in A-Spice process

Have experiences working with Iso 26262 standard

Have experiences working with Product Project, Outsource, IOT, Android, IOS, SQL

Have experiences work with hardware, communicate between hardware and software

Have experiences working with version control system: Git systems, SVN client, SVN server...

Have experiences working with Working process System: Jira, Confluence, Redmine, Trello...

Work with Bluetooth, Wifi, Android, IOS (System Service, Beacon Service, module communicate), embedded...

EDUCATION HISTORY

From: 09/2012 To: 10/2016	University: Ha Noi University of Science and Technology, Vietnam Major: Electronic Telecommunication Engineering Degree/Qualification: Scholarship to the Microchip company Graduated with honors in scientific research Traning student
From: 10/2016 To: 6/2017	University: Ha Noi University of Science and Technology, Vietnam Major: Electronic Telecommunication Engineering Job Description: - System design for HF communication System - Coding - Traning student

EMPLOYMENT HISTORY

From: 06/2017 To: 2/2021	Job Title: Senier Developer Job Description: - Solution Architecture - Requriment analysic - Create High level design, Low level design - Coding - Unit test - Integration test

PROJECT REFERENCE AND SKILL SET

ATTENDED PROJECTS		
Personal Project	Github Profile	https://github.com/TruongGlacio?tab=repositories
From: 10/2021-Current	Project	NaviTracking
	Company name	FFT Company
	Project size	4
	Project position:	Mobile Component
	Responsibility:	Design, Developer , Development testing
	Project description:	The project is a part of the vehicle tracking system, which has the function of tracking and reporting vehicle tracking information to customers.
	Used programming languages:	Flutter, Java, Kotlin, swift5
	Used programming technologies:	Restful api, Firebase SDK,CleverTap, sqlite, Bloc
From: 08/2021-Current	Project	Monkey Stories
	Company name	Early Start
	Project size	6
	Project position:	Developer
	Responsibility:	Design, Developer ,Leader, Development and maintenance, testing
	Project description:	Monkey Stories is an English learning app that helps children to master English before the age of 10! (suitable for children aged 2-10 years old). This application is developed based on Cocos2dx platform.
	Used programming languages:	Java, swift5, c++
	Used programming technologies:	Restful api, Firebase SDK,CleverTap, Coco2dx platform, sqlite, NDK

From: 10/2021-01/2022	Project	Hospital Appointy
	Company name	FFT Company
	Project size	5
	Project position:	Developer
	Responsibility:	Design, Developer, Development testing
	Project description:	An app for scheduling medical examination for Hai Phong Medical University Hospital
	Used programming languages:	Java android
	Used programming technologies:	Restful api, Sqlite
From: 10/2021-01/2022	Project	BartendingDrink Systems
	Company name	FFT Company
	Project size	5
	Project position:	Developer
	Responsibility:	Design, Developer, Development testing
	Project description:	An app for ordering drinks.
	Used programming languages:	Java
	Used programming technologies:	Restful api. Sqlite, firebase
From: 06/2021-08/2021	Project	FasterVPN
	Company name	FFT Company
	Project size	2
	Project position:	Mobile Component
	Responsibility:	Design, Developer, Development testing
	Project description:	Flutter Android VPN based on OpenVPN Library.

	Used programming languages:	Flutter, java
	Used programming technologies:	Restful api, OpenVPN, GetX
From: 02/2021 To 8/2021	Project	TOPGPS, VnetGPS
	Company name	VNET/ SonHa Group
	Project size	9
	Project position:	Leader Android Components
	Responsibility:	Analyze customer requirements, Create SRS, Design, Developer ,Leader, Development and maintenance, testing
	Project description:	The project is a part of the vehicle tracking system, which has the function of tracking and reporting vehicle tracking information to customers. With tens of thousands of customers each year. The project has 3 parts: Service, Web, and Android Apps. Android department with 2 main apps and more than 20 apps for dealers
	Used programming languages:	Java, Java android, sql, swift5
	Used programming technologies:	Restful api, stream video, minio, MQTT, google map, GPS, Firebase
From: 12/2020 To: 2/2021	Project	AUTOMATION TOOL
	Company name	FPT Software
	Project size	8 member
	Project position:	Solution Architect, Designer, Developer, Team Leader
	Responsibility:	- Created Documents, Design, Development
	Project description:	An automotive project which develops by Panasonic company. Implement new project for MessageApp module, Voice module
	Used programming languages:	C++, Python, xml, AI, ImageProcess
From: 05/2020 To: 12/2020	Project	KINGDOM
	Company name	FPT Software

	Project size	30 member
	Project position:	Designer, Developer, Team Lead for MessageApp team
	Responsibility:	- Created Documents, Design, Development MessageApp Module Maintain for KingDom systems
	Project description:	An automotive project which develops by Panasonic company. Implement new project for MessageApp module, Voice module
	Used programming languages:	C++, Python, Bluetooth
	Used programming technologies:	KingDom, Embedded
From:05/2019 To: 05-2020	Project	AUTRONSAFETY
	Company name	FPT Software
	Project size	150 member
	Project position:	Designer, Developer
	Responsibility:	- Created Documents, Design, Development, Guideline Test Process, Test, Created tools support
	Project description:	An automotive project which develops AUTOSAR basic software SRS/SWS for more than 70 modules in version 4.4.0. The safety modules has to follow Aspic level 3
	Used programming languages:	C
	Used programming technologies:	Safety ASILD , Iso 62626, AUTOSAR, Embedded
From: 03/2019 To: 05/2019	Project	TRANSLATION
	Company name	VTI VIET NAM
	Project size	5
	Project position:	Main Designer, Main Developer
	Responsibility:	- Design, Development, Test
	Project description:	Develop Translate Application using provided translate service include document translate, text translate, using python language and AI

	Used programming languages:	Python
	Used programming technologies:	AI Deepp Learning
From: 2/2019 To: 03/2019	Project	HARMONIC CONTROL
	Company name	VTI VIET NAM
	Project size	2
	Project position:	Main Designer, Main Developer
	Responsibility:	- Design, Development
	Project description:	- Research and design schematic PCB control Daikin remote control of VRV harmonic system in building - Develop custom Android and IOS applications control harmonic for user using xamarin framework.
	Used programming languages:	Xamarin c#, Arduino c++,
	Used programming technologies:	Altium PCB design
From :12/2018 To: 02/2019	Project	VTI SAYHI
	Company name	VTI VIET NAM
	Project size	6
	Project position:	Developer
	Responsibility:	- Design, Development
	Project description:	- Develop a receptionist Application using in living room to recommend structure and execute projects for customer using QT framework on linux system
	Used programming languages:	Qt c++,
	Used programming technologies:	Mouse control, yolo3
From 07/2018	Project	RS Receiver

To: 12/2018		
	Company name	VTI VIET NAM
	Project size	8
	Project position:	Developer
	Responsibility:	- Design, Development
	Project description:	Developed QR code scanner application to filter data scan from scan device
	Used programming languages:	C++
	Used programming technologies:	RS232 protocol
From 05/2018 To: 7/2018	Project	NSTEX
	Company name	VTI VIET NAM
	Project size	7
	Project position:	Developer
	Responsibility:	- Design, Development
	Project description:	Developed monitor system for steel production line in manufacturing companies of Japan
	Used programming languages:	C++
	Used programming technologies:	RS232 protocol.
From: 02/2018 To: 05/2018	Project:	A1 Platform
	Company name:	FPT SOFTWARE
	Project size:	70
	Project position:	Developer
	Responsibility:	- Refactoring and Maintenance applications and HMI for a Camera Control System in Automobile of Panasonic. - Design, control HMI and fix Bug, support team - Git, SVN and redmine manage for project

	Project description:	The project aims to maintain most automotive application and HMI module developed by other and partner
	Used programming languages:	C, C++
	Used programming technologies:	
From: 8/2017 To: 2/2017	Project:	MIB3
	Company name:	FSOFT
	Project size:	45
	Project position:	Developer
	Responsibility:	- Develop modules which are bluetooth applications, data, and events regarding bluetooth in the automotive system
	Project description:	The project aims to maintain most automotive application and meidia module developed by us and partner
	Used programming languages:	- C/C++, Java
	Used programming technologies:	- Ethernet, 3g, Bluetooth, Wifi, Wifi hotspot, ... - Multithread, KIPC interface, mutil call....
From: 11/2016 To: 6/2017	Project:	HF Digital communication
	University:	Ha Noi University of Science and Technology, Vietnam
	Project size:	6
	Project position:	Hardware design, system design, Developer
	Responsibility:	- Design and Development for HF Digital Communication System of 'Ministry of Industry and Trade'.
	Project description:	The project aims to design and develop system HF communication service of the sea developed by us
	Used programming languages:	- Qt, C/C++, Verilog for FPGA

[illegible]

INFORMATION TECHNOLOGY SKILLS

Experiences 0: 0 month

1: 1 – 6 months

Last year used

2: 6 – 12 months

3: 1 – 2 years

4: 2 – 5 years

5: > 5 years

Expert level 1: Beginner Level

3: Sometimes have to use manuals

5: Expert Level

2: Always have to use manuals**4: Can solve problems**
