

CURRICULUM VITAE

BUI XUAN TRUONG

PERSONAL DETAILS

	Full Name:	Bui Xuan Truong
	Job Titles:	Senior Developer
	Date of Birth:	June 13 st 1994
	Place of Birth:	Thai Binh, Vietnam
	Gender:	Male
	Linkedin	https://www.linkedin.com/in/bui-xuan-truong-43b521190
	Phone/email	+84359018836 / buixuantruong.tb@gmail.com

SUMMARY INFORMATION

Have 8 years experiences on developing for mobile (C++, C#, Java, Flutter, Kotlin, Swift)

Have 5 years experiences on developing software (C, C++, C#, Qt, Qt UI, QML, Java, Java Spring, Android, Python, Flutter, Kotlin multiplatform, swift)

Have experiences and deep understanding on developing software for Media service in Vehicle, Linux system, Embedded system, IOT,

Have experiences in testing project in A-Spice process

Have experiences working with Iso 26262 standard

Have experiences working with Product Project, Outsource, IOT, Android, IOS, SQL

Have experiences work with hardware, communicate between hardware and software

Have experiences working with version control system: Git systems, SVN client, SVN server...

Have experiences working with Working process System: Jira, Confluence, Redmine, Trello...

Work with Bluetooth, Wifi, Android, IOS (System Service, Beacon Service, module communicate), embedded...

EDUCATION HISTORY

From: 09/2012 To: 10/2016	University: Ha Noi University of Science and Technology, Vietnam Major: Electronic Telecommunication Engineering Degree/Qualification: Scholarship to the Microchip company Graduated with honors in scientific research Training student
From: 10/2016 To: 6/2017	University: Ha Noi University of Science and Technology, Vietnam Major: Electronic Telecommunication Engineering Job Description: - System design for HF communication System - Coding - Training student

PROJECT REFERENCE AND SKILL SET

ATTENDED PROJECTS

From: 11/2025- current	Project	MCMS Project
	Company name	Iotek Company
	Project size	13
	Project position:	Senior Mobile developer, Backend (BE) API Developer
	Responsibility:	Developer, Development testing, Support customer
	Project description:	Developing MCMS applications within the MCM property management system. Research and developing for integration ACC to MCM system
	Used programming languages:	Flutter, python, java spring boot, Angular

	Used programming technologies:	Restful api, firebase SDK, Azure S3, kafka, ACC Autodesk construction cloud, , AES 256
From: 2/2026-Now	Project	STouch
	Company name	-
	Project size	1
	Project position:	Mobile
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	A charging station system used for electric vehicle charging with the benefits of a charging station ecosystem The Stouch application has been redeveloped based on the new Kotlin Multiplatform.
	Used programming languages:	Kotlin multiplatform
	Used programming technologies:	Restful api, biometric, Firebase SDK, AES 256, Bloc, Realtime MQTT
From: 08/2024-11/2025	Project	KAFA Project
	Company name	FFT Company
	Project size	8
	Project position:	Lead
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	Develop a retail system for Kafa
	Used programming languages:	Flutter
	Used programming technologies:	Restful api, Printer machines
From: 06/2024-09/2025	Project	Elearning
	Company name	FFT Company
	Project size	4
	Project position:	Lead FrontEnd
	Responsibility:	Design, Developer, Development testing, Leader

	Project description:	A project on developing a combined online Chinese learning system
	Used programming languages:	Flutter
	Used programming technologies:	Restful api, Audio, youtube framework
From: 5/2024-Now	Project	SmartHR
	Company name	FFT Company
	Project size	4
	Project position:	Lead
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	A human resource management application with the following functions: - Employee management - Department management - Order management - Time management - Work management - Patrol management - Salary management
	Used programming languages:	Java android, Swift, Flutter
	Used programming technologies:	Restful api, biometric
From: 08/2025-Now	Project	Snew
	Company name	FFT Company
	Project size	6
	Project position:	Lead FrontEnd
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	A charging station system used for electric vehicle charging with the benefits of a charging station ecosystem
	Used programming languages:	Java android, Swift, Flutter, js

	Used programming technologies:	Restful api, biometric, AES 256
From: 06/2024-Now	Project	Tram sac xe dien
	Company name	FFT Company
	Project size	4
	Project position:	Lead FrontEnd
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	A charging station system used for electric vehicle charging with the benefits of a charging station ecosystem
	Used programming languages:	Java android, Swift, Flutter, js
	Used programming technologies:	Restful api, biometric
From: 08/2024-Now	Project	NVCharge
	Company name	FFT Company
	Project size	4
	Project position:	Lead FrontEnd
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	A charging station system used for electric vehicle charging with the benefits of a charging station ecosystem
	Used programming languages:	Java android, Swift, Flutter, js
	Used programming technologies:	Restful api, biometric
From: 10/2021-Current	Project	FFTGPS
	Company name	FFT Company
	Project size	4
	Project position:	Mobile Component
	Responsibility:	Design, Developer , Development testing

	Project description:	The project is a part of the vehicle tracking system, which has the function of tracking and reporting vehicle tracking information to customers
	Used programming languages:	Flutter, Java, Kotlin, swift5
	Used programming technologies:	Restful api, Firebase SDK , sqlite, Bloc, Realtime MQTT
From: 11/2023-Now	Project	Stouch
	Company name	FFT Company
	Project size	6
	Project position:	Lead FrontEnd
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	A charging station system used for electric vehicle charging with the benefits of a charging station ecosystem
	Used programming languages:	Java android, Swift, Flutter, js
	Used programming technologies:	Restful api, biometric, Firebase SDK, AES 256, Bloc, Realtime MQTT
From: 11/2022-03/2024	Project	LOffice
	Company name	LPBank
	Project size	20
	Project position:	Lead FrontEnd
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	An Office System using local of LPBank
	Used programming languages:	Java android, Swift, Flutter, js
	Used programming technologies:	Restful api, biometric, ViettelCA sign
From: 11/2022-03/2024	Project	MOOffice
	Company name	MB Bank

	Project size	20
	Project position:	Lead FrontEnd
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	An Office System using local of MBBank
	Used programming languages:	Java android, Swift, Flutter, js
	Used programming technologies:	Restful api, biometric, ViettelCA
Personal Project	Github Profile	https://github.com/TruongGlacio?tab=repositories
From: 10/2021-Current	Project	NaviTracking
	Company name	FFT Company
	Project size	4
	Project position:	Mobile Component
	Responsibility:	Design, Developer , Development testing
	Project description:	The project is a part of the vehicle tracking system, which has the function of tracking and reporting vehicle tracking information to customers.
	Used programming languages:	Flutter, Java, Kotlin, swift5
	Used programming technologies:	Restful api, Firebase SDK,CleverTap, sqlite, Bloc
From: 8/2021-10/2022	Project	VMonkey
	Company name	Early Start CO.,LTD
	Project size	10
	Project position:	Lead
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	VMonkey is a Vietnamese language learning application for Kindergarten & Primary School children under the new General Education Program, closely following the primary school output standards

	Used programming languages:	Java android, Swift, Cocos2d-x
	Used programming technologies:	Restful api, media play, Sqlite
From: 8/2021-10/2022	Project	Monkey stories
	Company name	Early Start CO.,LTD
	Project size	10
	Project position:	Lead
	Responsibility:	Design, Developer, Development testing, Leader
	Project description:	Monkey Stories is an English language learning program which aims at helping children be fluent in English before the age of 10 (suitable for children of 2 - 10 years of age).
	Used programming languages:	Java android, Swift, Cocos2d-x
	Used programming technologies:	Restful api, media play, Sqlite
From: 10/2021-01/2022	Project	BartendingDrink Systems
	Company name	FFT Company
	Project size	5
	Project position:	Developer
	Responsibility:	Design, Developer, Development testing
	Project description:	An app for ordering drinks.
	Used programming languages:	Java
	Used programming technologies:	Restful api. Sqlite, firebase

From: 06/2021-08/2021	Project	FasterVPN
	Company name	FFT Company
	Project size	2
	Project position:	Mobile Component
	Responsibility:	Design, Developer, Development testing
	Project description:	Flutter Android VPN based on OpenVPN Library.
	Used programming languages:	Flutter, java
	Used programming technologies:	Restful api, OpenVPN, GetX
From: 02/2021 To 8/2021	Project	TOPGPS, VnetGPS
	Company name	VNET/ SonHa Group
	Project size	9
	Project position:	Leader Android Components
	Responsibility:	Analyze customer requirements, Create SRS, Design, Developer ,Leader, Development and maintenance, testing
	Project description:	The project is a part of the vehicle tracking system, which has the function of tracking and reporting vehicle tracking information to customers. With tens of thousands of customers each year. The project has 3 parts: Service,Web, and Android Apps. Android department with 2 main apps and more than 20 apps for dealers
	Used programming languages:	Java, Java android, sql, swift5
	Used programming technologies:	Restful api, stream video, minio, MQTT, google map, GPS, Firebase
From: 12/2020 To: 2/2021	Project	AUTOMATION TOOL
	Company name	FPT Software
	Project size	8 member
	Project position:	Solution Architect, Designer, Developer, Team Leader
	Responsibility:	- Created Documents, Design, Development

	Project description:	An automotive project which develops by Panasonic company. Implement new project for MessageApp module, Voice module
	Used programming languages:	C++, Python, xml, AI, ImageProcess
From: 05/2020 To: 12/2020	Project	KINGDOM
	Company name	FPT Software
	Project size	30 member
	Project position:	Designer, Developer, Team Lead for MessageApp team
	Responsibility:	- Created Documents, Design, Development MessageApp Module Maintain for KingDom systems
	Project description:	An automotive project which develops by Panasonic company. Implement new project for MessageApp module, Voice module
	Used programming languages:	C++, Python, Bluetooth
	Used programming technologies:	KingDom, Embedded
From: 05/2019 To: 05-2020	Project	AUTRONSAFETY
	Company name	FPT Software
	Project size	150 member
	Project position:	Designer, Developer
	Responsibility:	- Created Documents, Design, Development, Guideline Test Process, Test, Created tools support
	Project description:	An automotive project which develops AUTOSAR basic software SRS/SWS for more than 70 modules in version 4.4.0. The safety modules has to follow Aspic level 3
	Used programming languages:	C
	Used programming technologies:	Safety ASILD , Iso 62626, AUTOSAR, Embedded
From: 03/2019 To: 05/2019	Project	TRANSLATION

	Company name	VTI VIET NAM
	Project size	5
	Project position:	Main Designer, Main Developer
	Responsibility:	- Design, Development, Test
	Project description:	Develop Translate Application using provided translate service include document translate, text translate, using python language and AI
	Used programming languages:	Python
	Used programming technologies:	AI Deepp Learning
From: 2/2019 To: 03/2019	Project	HARMONIC CONTROL
	Company name	VTI VIET NAM
	Project size	2
	Project position:	Main Designer, Main Developer
	Responsibility:	- Design, Development
	Project description:	- Research and design schematic PCB control Daikin remote control of VRV harmonic system in building - Develop custom Android and IOS applications control harmonic for user using xamarin framework.
	Used programming languages:	Xamarin c#, Arduino c++,
	Used programming technologies:	Altium PCB design
From :12/2018 To: 02/2019	Project	VTI SAYHI
	Company name	VTI VIET NAM
	Project size	6
	Project position:	Developer
	Responsibility:	- Design, Development
	Project description:	- Develop a receptionist Application using in living room to recommend structure and execute projects for customer using QT framework on linux system

	Used programming languages:	Qt c++,
	Used programming technologies:	Mouse control, yolo3
From 07/2018 To: 12/2018	Project	RS Receiver
	Company name	VTI VIET NAM
	Project size	8
	Project position:	Developer
	Responsibility:	- Design, Development
	Project description:	Developed QR code scanner application to filter data scan from scan device
	Used programming languages:	C++
	Used programming technologies:	RS232 protocol
From 05/2018 To: 7/2018	Project	NSTEX
	Company name	VTI VIET NAM
	Project size	7
	Project position:	Developer
	Responsibility:	- Design, Development
	Project description:	Developed monitor system for steel production line in manufacturing companies of Japan
	Used programming languages:	C++
	Used programming technologies:	RS232 protocol.
From: 02/2018 To: 05/2018	Project:	A1 Platform

	Company name:	FPT SOFTWARE
	Project size:	70
	Project position:	Developer
	Responsibility:	- Refactoring and Maintenance applications and HMI for a Camera Control System in Automobile of Panasonic. - Design, control HMI and fix Bug, support team - Git, SVN and redmine manage for project
	Project description:	The project aims to maintain most automotive application and HMI module developed by other and partner
	Used programming languages:	C, C++
	Used programming technologies:	
From: 8/2017 To: 2/2017	Project:	MIB3
	Company name:	FSOFT
	Project size:	45
	Project position:	Developer
	Responsibility:	- Develop modules which are bluetooth applications, data, and events regarding bluetooth in the automotive system
	Project description:	The project aims to maintain most automotive application and media module developed by us and partner
	Used programming languages:	- C/C++, Java
	Used programming technologies:	- Ethernet, 3g, Bluetooth, Wifi, Wifi hotspot, ... - Multithread, KIPC interface, mutli call....
From: 11/2016 To: 6/2017	Project:	HF Digital communication
	University:	Ha Noi University of Science and Technology, Vietnam
	Project size:	6
	Project position:	Hardware design, system design, Developer
